

access to United States markets, in order to maintain the economic growth that is the single most important prop to the current Chinese regime. Chinese exports into the U.S. market are vital to the Chinese regime, while U.S. exports and investment into the Chinese market are trivial relative to U.S. domestic and international economic activity. China is therefore quite susceptible to the kind of United States bilateral tools that enforced the GATT system and U.S.-China bilateral trade deals for decades, if those tools are effectively and consistently deployed.

In fact, if China joins the WTO and Congress votes against PNTR, China will be subject both to bilateral disciplines by the United States and to WTO multilateral disciplines by Europe, Japan, and other WTO members. Furthermore, if the WTO resolves any disputes against China in a way that affords economic benefits to our competitors, the United States is also entitled to receive those benefits, since the 1979 Bilateral Agreement requires China to grant to the United States any benefits it grants to third countries.

The first "procedural" concern ignored by Jackson—unilateral disarmament by the United States—is compounded by a second. The WTO is an intergovernmental organization that operates by negotiated consensus. The world's most powerful countries play a disproportionate role in shaping that consensus. Upon joining the WTO, China—the world's largest Police State—will therefore have a powerful vote, and an effective veto, in any future WTO efforts to reform the ground rules of global markets.

In other words, China will be authorized to block any proposals—of the kind supported in Seattle by the Clinton Administration itself—to add basic human, labor, and environmental rights to the WTO system. This would mark a significant set-back for all those individuals, governments, and non-governmental organizations who aspire to ensure that the rules of the global economy protect not only commercial rights but fundamental personal and social rights.

In sum: At a minimum, Ms. Barshefsky greatly understates the economic concessions which China will remain legally obligated to grant the United States if Congress votes against PNTR; and Professor Jackson greatly overstates the net benefits to the United States, in terms of capacity to enforce United States interests, if Congress votes for PNTR and the United States enters a "binding WTO relationship" with China.

Equally important, Ms. Barshefsky and Professor Jackson both examine only one side of the scale—namely, the potential benefits to United States commercial interests. They do not examine the costs of U.S. abandonment of all trade-related enforcement measures—multilateral or unilateral—aimed toward ensuring that the global regime protects fundamental individual rights of autonomy and associated, and safeguards distributive justice and social wellbeing of a sort that cannot be measured by maximization of corporate shareholder returns or aggregate monetary wealth.

The "cost" side of the scale is all the weightier, relatively speaking, once Ms. Barshefsky's and Professor Jackson's overstatement of the commercial "benefits" of PNTR is fully recognized.

In deciding which way to vote on PNTR, our Representatives should at least have an accurate understanding of the costs and benefits they must weigh.
